Operating instructions

- Add Eumulgin® SG into water of phase B and heat under very low mixing (to avoid foam) until complete dissolution.
- Add Structure® Solanace to Water and Glycerin of phase C, then mix and heat to 75°C.
- Continue mixing for about 5 minutes.
- Under mixing, add Satiaxane™ CX91 to phase C.
- Add B to C and heat to 75°C.
- Prepare A and heat to 75°C.
- Under rapid mixing (Rotor/Stator 3000 rpm), add A to B+C.
- Continue rapid mixing for about 10 minutes then cool.
- At about 35°C, add ingredients of D.

- + Think twice
- + Low residual film
- + Nourishing texture

Description

This body lotion has a fluid texture that will mislead you on its true intentions. When applied on the skin, it is ultra moisturizing and nourishing to please very dry skin. Emulium® Mellifera MB leaves a light and nourishing residual film after application, reinforcing the impression that this lotion is not what it seems. Acticire® MB, with the help of Gatuline® Skin-Repair Bio, deeply moisturizes and soothes even the driest skin.

Specifications

- + Aspect:
Yellow orange lotion
- + pH = 7.6 ± 0.5
- + Viscosity Brookfield RV (spindle A, speed 5):
approx. 4 400 mPa.s after 24h

Ingredients

- **Emulium® Mellifera MB** at 3% creates a stable and pleasant lotion with an ideal lightness for a body balm.
- **Acticire® MB**, at 6%, brings durable comfort and moisturization to the skin thanks to polyglycerized waxes.
- Eumulgin® SG is a co-emulsifier that improves stability and helps to decrease the viscosity.
- Xanthan Gum and Structure® Solanace are gelling agents increasing stability.
- **Lipocire™ A SG** is a certified RSPO Segregated texture agent improving the melting feel.
- **MOD** and Glycerin are emollients to improve the feel on the skin and moisturization.
- **Gatuline® Skin-Repair Bio** is a cotton thistle flower extract stimulating epidermal regeneration and cutaneous repair. It restores skin barrier function for an enhanced moisturization and protection.
