Operating instructions

- Heat water and glycerin to 75°C and add Avicel® PC 591 under mixing.
- Continue mixing for about 15 minutes.
- Add Satiaxane™ CX91 under mixing.
- Prepare A and heat to 75°C.
- Under rapid mixing (Rotor/Stator 3000rpm), add A to B.
- Mix for about 10 minutes.
- Cool under mixing and at about 35°C, add C.

Beard Groomer

2031-1.08

- + Moisturizing
- + Blade soothing
- + Smoothing

Description

Designed for bearded gentlemen, this cream moisturizes and smoothes the driest of beards. Thanks to Definicire™, it leaves a soft and smooth layer keeping the beard groomed all day long, while Emulium® Mellifera MB soothes skins irritated with razor blades.

Apply a small amount on a clean and dry beard and leave to dry.

Specifications

+ Aspect:
White bright emulsion

+ pH = 6.1 ± 0.5

+ Viscosity Brookfield (spindle B, speed 5):
approx. 27 000 mPa.s after 24H.

Ingredients

- **Emulium® Mellifera MB**, at 3%, creates a natural O/W emulsion with a low residual film, perfect to leave a soft film on the beard without any greasiness or stickiness, associated with a substantiated soothing effect.
- **Definicire™** is a natural texture agent based on polyglycerized waxes, nourishing even the driest of beards and leaving a soft and smooth film.
- PCL Solid, Tsubaki Oil and Jojoba Oil are emollients, ensuring gloss and softness and providing nourishment to the beard.
- Tocopherol is an antioxidant preventing oils maturation.
- Cetyl Alcohol helps to increase the viscosity.
- Xanthan Gum and Avicel® PC 591 are gelling agents ensuring stability of the formulation.
- Glycerin is a moisturizing emollient for the beard.
