Relaxing powder

Make it glow

Description

Introducing a new gesture, this innovative coconut powder needs to be diluted in water to be used either as a cream, at a ratio 1:1, or as a lotion, at a ratio 1:3. It will make you feel relax at all times: the powder will catch the sweat during your workout or provide a powdery soft feeling when used as body lotion after your workout. Pleasure is increased thanks to the emollient MOD which gives a dry and soft feeling while Gatuline® Radiance boosts skin microcirculation during your exercise.

Specifications

- + Aspect:
Ivory powder

Ingredients

- **L.A.S.** helps to disperse the powder into water and to emulsify it.
- Novemer™ EC-2 allows to thicken the dilution of the powder.
- **MOD** is a natural emollient giving a dry and soft feeling.
- Glycerin ensures moisturization of the skin.
- Tapioca Starch gives a powdery touch and allows absorption of sebum and sweat on the skin.
- **Gatuline® Radiance** is a chinese fruit extract which boosts skin's microcirculation for natural rosy cheeks.
